PROFILE SUMMARY

Data Science & Analytics enthusiast with hands-on experience across three internships spanning AI/ML, data analysis, and business intelligence. Skilled in Python, SQL, and modern visualization tools (Power BI, Tableau), with a proven ability to turn raw data into clear, actionable insights. Built multiple end-to-end projects — including an AI-powered sustainability platform with predictive analytics and computer vision. Certified by Microsoft, IBM, and Deloitte. Looking to bring a strong analytical mindset and fast-learning attitude to a data-driven team.

EDUCATION

CKPCET, Surat, Gujarat, India BE in Computer Engineering CGPA: 7.57	2023 - 2026	GGP, Surat, Gujarat, India Diploma in Computer Engineering CGPA: 7.24	2021 - 2023
---	--------------------	---	--------------------

WORK EXPERIENCE

Microsoft Corporation — AI/ML Intern • Completed an AI/ML internship focused on machine learning pipelines, data preprocessing, and model building using Python and industry-standard ML libraries. • Strengthened problem-solving skills by applying real-world ML workflows, building job-ready expertise in developing data-driven, intelligent solutions.	Jan 2026 - Apr 2026
Unified Mentor — Data Analyst Intern • Performed data cleaning, statistical analysis, and visualization using Excel and SQL to support data-driven decision-making. • Built strong analytical foundations, translating raw datasets into structured, actionable business insights.	Sep 2025 - Dec 2025
CSRBOX — Data Analyst Intern • Conducted data cleaning, exploratory analysis, and visualization using Excel, Tableau, and SQL. • Developed critical thinking and problem-solving skills applicable to real-world analytics scenarios.	Jul 2025 (2 weeks)

PROJECTS

- AI-Powered Sustainability Intelligence System** — Designed and built a full-stack analytics platform featuring real-time CO₂ monitoring, predictive analytics, anomaly detection, a sustainability scoring engine, computer vision-based analysis, and an integrated AI chatbot, using Python, Machine Learning, and interactive dashboards.
- Data Science Salary Trends** — Analyzed global Data Science compensation data to uncover how role, experience level, and company size drive salary variation, presenting findings through visual storytelling.
- Netflix Content Analysis** — Cleaned and analyzed Netflix's global content catalog to identify genre, country, and release-year trends, and built a predictive model on the processed dataset.
- Goal Tracker App** — Built a productivity application enabling users to manage tasks, track progress, and set reminders, improving personal goal achievement and time management.

SKILLS

- Data Analytics & Data Science:** Python, SQL, Excel (Advanced), Power BI, Tableau, Statistics, Data Visualization, Data Cleaning, Data Preprocessing, EDA, Machine Learning
- Libraries & Tools:** Pandas, NumPy, Matplotlib, Seaborn, Scikit-Learn, Plotly, GitHub, Google Colab, VS Code
- Programming:** Python, SQL, HTML, CSS
- AI & Productivity Tools:** ChatGPT, Gemini, Claude AI, Canva, Google Sheets, MS Office Suite
- Soft Skills:** Communication, Problem Solving, Teamwork, Time Management, Quick Learning

CERTIFICATIONS

- IBM SkillsBuild — Data Analysis Course
- Deloitte — Data Analytics Job Simulation
- CSRBOX — Data Analyst Internship
- Unified Mentor — Data Analyst Internship
- Microsoft Elevate — AI/ML Internship
- Microsoft SkillsBuild — Power BI, Azure, Copilot, AI/ML
